

IT-218: Final Website Project

The final project has two components:

1. User Data
2. Functionality

User Data

You must enter the following content into your site to show how it looks fully populated. Your website must include the following.

- At least 7 **users**
- Each user must have at least 10 **gallery** images
- Each user must have at least 7 **events**
- Each event must have at least 5 **event gallery** images

This will fully populate your Home/Index. You then will log in as each of the 7 users to rate and like events.

- Each user should rate 10 events (use random ratings)
- Each user should like 10 events (like random events)

Functionality

The final project must include all functionality from all assignments complete and published on your website. Below is a list of the primary components.

- In general, all inserting, updating, deleting, and selecting within your database must be functioning
- Responsive CSS
 - Header: shorter text
 - Left navigation: resized buttons
 - Section/item divs
 - Gallery and event resizing
- Complete CSS for user-image-container
 - Padding
 - Margin
 - Borders
 - Shadow
- Profile
 - Sign in
 - Sign up
 - Profile properties
 - Gallery pics (add and delete)
 - Sign out
- Events
 - Create and edit
 - HTML5 date and time boxes
 - Event gallery pics (add and delete)
